PROFILE

BCA graduate (2026) with a commerce background, looking for Business Analyst and Data Analyst fresher roles. Strong in Advanced Excel: Pivot Tables, VLOOKUP and XLOOKUP, Power Query, Power Pivot, charts and dashboards, which I use to clean data, run validation and quality checks, and turn it into reports and insights for business decisions. I know basic SQL and Python, and am learning SQL in more depth and Power BI. Good analytical and problem-solving skills, with clear written and verbal communication for documentation and presentations. Available to join immediately.

SKILLS

Business Analysis: Business understanding, documentation, analytical and problem-solving skills, reporting insights to teams

Data Analysis: Data cleaning, data validation and quality checks, interpreting trends, summarising data into reports, data visualisation with charts

MS Excel (Advanced): Pivot Tables and Slicers, VLOOKUP, XLOOKUP, HLOOKUP, INDEX+MATCH, SUMIF/SUMIFS, COUNTIF/COUNTIFS, Power Query, Power Pivot, Excel Dashboards, Data Validation, Conditional Formatting, Tables, Sorting, Filtering

SQL: Basic: SELECT, WHERE, ORDER BY, LIMIT, GROUP BY, aggregate and built-in functions, tables, data types, constraints (learning more)

Python: Basic (scripting and simple automation)

Power BI: Learning (dashboards and reports)

Communication and Presentation: Written and verbal communication, Microsoft PowerPoint

Other Tools: Claude and ChatGPT (research and analysis), Git/GitHub, Linux

PROJECTS

Sales Analysis Dashboard (Excel, self-practice) | *Nov 2026*

- Built an interactive Excel dashboard on a 25-order sample sales dataset (Jan to Mar 2026): Excel Table with calculated sales, cost and profit columns, summarised using Pivot Tables.
- Dashboard shows KPI cards (total sales, profit, average order value, quantity, orders) and 5 charts: sales and profit by product, sales by region, category share and monthly sales and profit trend, with Region and Category slicers.
- Insights found: Laptops gave about 63% of sales, Electronics about 92%, North was the top region, and overall profit margin was about 23%.

Excel Analysis Exercise (self-practice) | *Present*

- Ran a data quality check by using XLOOKUP to map departments to 40 orders, showing "Not found" for IDs that did not match, so mismatches were easy to spot.
- Used SUMIF and COUNTIF to total sales by department and count the unmatched orders.

ShopSphere: E-commerce Web Application (MERN Stack) (college team project) | *Aug 2025 – Nov 2025*

- Handled the frontend role: built product listing, category filtering and a multi-step checkout flow in React and Tailwind CSS.
- Implemented cart functionality using Context API and a reducer.

EDUCATION

Sirifort Institute of Management Studies, affiliated to GGSIPU | *Delhi*

Bachelor of Computer Applications (BCA) | *2023 – Jul 2026*

- Relevant coursework: Database Management Systems (DBMS), SQL, Statistics, Data Analysis, and spreadsheet-based analysis.

CERTIFICATIONS AND COURSES

Cloud Computing, IBM (online course) | *Feb 2026 – Present*

Introduction to Cybersecurity, Cisco Networking Academy | *Jul 2026 – Present*
